DUCROS MINES LIMITED
(no personal liability)

For immediate release

October 10, 1967.

Ducros Mines Limited has just signed a contract with Inspiration Limited for a minimum of 3000 feet of diamond-drilling to be carried out on its 28-claim group adjoining the East Sullivan property in Bourlamaque township. The ground was acquired from Timrod Mining Co. Ltd. for 750,000 vendors' shares.

An induced polarisation survey by Seigel Associates Limited has indicated seven anomalous zones, three of which are regarded as of particular interest, and these will be the first targets to be investigated. Drilling is to start immediately under the direction of Georges H. Dumont, Consulting Engineer.

Through an underwriting agreement with the firm of A. Renaud & Co. Ltd., covering the sale of 450,000 treasury shares, the Company has recently received \$75,000 and is therefore adequately financed to carry out the proposed program.
